

Virginia Butler

I've had the honor of representing our Palos Verdes Assn. of Realtors for many years, both locally and at CAR. There have been so many important issues that have threatened to inhibit our ability to do our jobs effectively, or eroded our (and our clients) private property rights. I've seen first hand why we need to be in the Capitols to protect and promote our Industry - a livelihood for most of us.

There seems to be no end to ways that local, state and national government representatives find to legislate how we do our job - or to try to extract money from us and/or our clients.

I try to bring my years of experience both at the Board and in the field to facilitate the discussions and decisions that are made on your behalf. I think the Board always needs a balance between "new" and "old" board members and I try to provide that balance to the best of my ability.

I would appreciate your support and am always available to listen to your concerns.

Thank you.
